PROFILE

I am an aspiring web developer having passion for making websites more senses and strong interest in web standards and emerging technologies with Angular, ReactJS, GraphQL, PWA, Serverless in AWS Cloud.

FRONT-END DEVELOPMENT

- W3C Standards with HTML5 and CSS3
- Javascript with ES2017 and Typescript
- SASS, CSS-In-JS (Styled-components)
- Angular, ReactJS, VueJS and Gatsby
- REST and GraphQL
- ApolloClient, AWS AppSync, AWS Amplify
- Gulp, Webpack and JS Testing Framework with Jasmine, Jest, Enzyme, React Testing Lib
- Continuous Deployment with Jenkins

BACK-END DEVELOPMENT

- NodeJS, ExpressJS and Apollo GraphQL Server
- AWS usage with EC2, S3, CloudFront, Cognito, Lambda, DynamoDB
- Basic Serverless
- Familiar with Java, C# and Python
- MongoDB and Postgres Databases

MOBILE DEVELOPMENT

- Hybrid Mobile App Framework
- React Native
- Flutter (still studying)

EXPERIENCE

Quanturi Oy

WEB DEVELOPER, 01/2020 - NOW

- Working as part of a small team of international developers, my role consists of testing and developing web applications both frontend and backend.

Verto Analytics Oy

SOFTWARE ENGINEER (FRONT-END), 07/2014 - 10/2019

- Role in developing all Verto's web applications by using AngularJS, ReactJS, Redux, illustrating data with HighchartJS and doing continuous deployment with Jenkins, GitLab and AWS services.

FilmFriend Startup

WEB DEVELOPER, COFOUNDER, 2013

- FilmFriend is the network to help customers and videographer connect together. Its main goals are finding videographer to edit wedding videos and offer them with wedding services. With my startup project, I am the principal developer of project and complete database, coding functions in both frontend and backend.
